Since the very first brew of Acorn Barnsley Bitter back in 2003 the brewery has amassed over 50 awards for the quality of its? cask and bottled beers.

They are very proud of all the awards from small regional beer festivals all the way through to prestigious national competitions and still continue to enter their beer into competitions. Mainly because they still get such a thrill from getting recognition from the people whose opinions really matter ? people who enjoy drinking good beer.

? Welcome to Acorn Brewery, Born and bred in Wombwell Barnsley, where we have been growing up since 2003. We broke our teeth on our first brewing kit, which was purchased from the Forester & Firkin Brew Pub of Stafford. Our first brew took place on the on the 4th July 2003 where we produced our flag ship, award winning Barnsley Bitter. From here we have gone from strength to strength introducing 6 core beers to our range. Along the way there have been a few bumped heads and scratched knees but it is safe to say we have grown into a strapping teenager, now living on a 25-barrel plant which we moved to during 2008. We are very passionate about the beers we brew and ensure that only quality products are produced. Did you know that as well as our core range we have brewed over 125 different single hopped IPA?s. Never using the same hop twice! Each month we release 2/3 signature beers, which always go down a treat. It?s fair to say that life is great and we would like to give a massive thanks to everyone in the Acorn family and to all our happy customers that enjoy our beers! ?

Acorn Brewery have a range of six permanent beers and a range of seasonal beers available on a monthly basis. Beers can be ordered for consumption at home or in 10 / 20l beer in a box up to 9 gallon firkins for private functions.
